Available in the following colours:

▼
YELLOW

▼
GREEN

▼
ORANGE

▼
RED

▼
PINK

▼
PURPLE

All Salon Smart Coloured Bleach can be intermixed to create endless colour options.

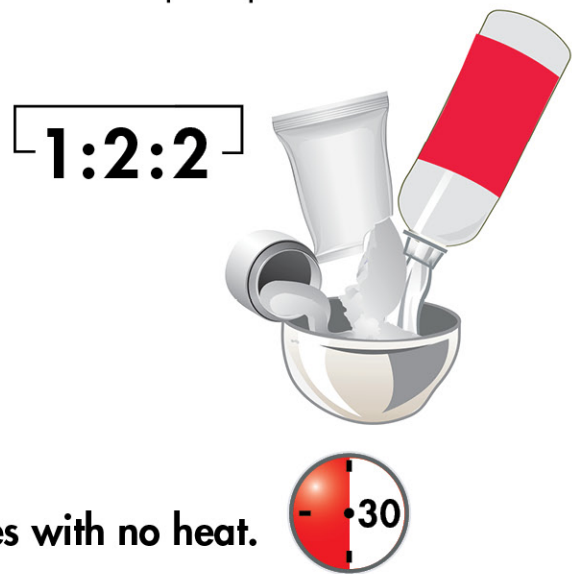

Mixing for bright and vibrant results:

1 part coloured bleach to 2 parts peroxide.

Mixing for a more pastel result:

1 part coloured bleach to 2 parts normal bleach powder to 2 parts peroxide.

Processing time: 20 – 30 minutes with no heat.

Recommended peroxide: 3% (10vol), 6% (20vol), 9% (30vol).

Salon Smart Coloured Bleach may be used directly on the scalp.

Mix your chosen Salon Smart Coloured Bleach and allow to sit for 1-2 minutes, ensure all pigment has been thoroughly mixed.

For best results Salon Smart Coloured Bleach should be applied on a level 6 and above.

POINTS TO REMEMBER:

- If results are lighter than expected it is likely that the peroxide strength is too high, or processing time has exceeded 30minutes.
- If the desired intensity has not been achieved it may be necessary to remove some of the colour build up or the hair maybe too porous.

We recommend not to use Salon Smart Coloured Bleach over lift and deposit tints, henna or extensions unless you have carried out a test strand.

To avoid staining it is recommended that the client and operator are well covered with cape or apron and the operator should wear gloves.
